

Radio Frequency Schedule Databases for DXers

May 2026

This document describes the leading online and published databases for radio frequency schedules across shortwave (SW), medium wave (MW), FM and utility bands. These resources are essential for software-defined radio (SDR) enthusiasts and DXers enabling precise signal hunting, logging, and memory bank programming. Data is drawn from community-maintained sites and commercial publications as of May 2026.

Overview of Key Databases

The list includes free web-based sources, searchable aggregators, and premium guides. Free options like EiBi and AOKI excel in SW broadcasting schedules, while MWList and FMList dominate AM/FM DXing. Commercial sources like ILGRadio and Klingenfuss provide unmatched utility station depth. SWSKEDS by Dan Ferguson merges multiple sources into a single, up-to-date text file accessible via groups.io and is favored by DXers for its comprehensive coverage.

EiBi (eibispace.de)

Primary SW broadcast schedule in TXT/CSV formats, sortable by time/frequency; maintained by Eike Bierwirth with archives since 2000.

AOKI List

Japanese-curated SW schedules with program names and frequent updates; often accessed via third-party tools.

HFCC (hfcc.org)

Official global SW frequency coordination database; authoritative for registered transmissions.

SWSKEDS (groups.io, by Dan Ferguson)

Merged EiBi/AOKI/HFCC schedules into one comprehensive text file; requires groups.io membership for access and updates.

ILGRadio (ilgradio.com)

Extensive SW broadcast/utility lists (~85,000 entries) with daily monitoring timestamps and graphical timelines. Low cost subscription.

Klingenfuss Publications

Annual guides like the 2026 Shortwave Frequency Guide (3,300+ BC entries, 8,700+ utilities) and Super Frequency List CD; includes digital mode screenshots.

MWList (mwlist.org)

Worldwide MW/LW/tropical band database with regional quick views, power details, and user logbooks. Registration restricted to contributors only.

FMList (fmllist.org)

Global FM/DAB/TV database with RDS/PI data, coverage maps, and propagation tools; community-edited. Registration restricted to contributors only.

Feature Comparison

Database	Primary Bands	Update Frequency	Formats / Access	Unique Strengths	Limitations
EiBi	SW, BC & some utility	Seasonal + periodic updates	TXT/CSV, web search	Archival depth, SDR-friendly exports	Limited utility stations
AOKI	SW, BC	Daily/seasonal	Text file	Frequently updated	Broadcast-focused only
HFCC	SW registered	Seasonal with updates	Zipped (multiple files)	Official coordination reference	Needs conversion utility
SWSKEDS	SW, BC & some utility (merged)	Seasonal with updates	CSV file	Single-file consolidation of sources	Group membership required
ILGRadio	SW, BC, Utility & MW	Daily bandscans	Paid downloads	Verified timestamps, graphics	Subscription only
Klingenfuss	SW, BC & HF utility	Annual editions	Print/CD/PDF	12K+ entries, decoders & screenshots	Paid, not real-time
FMList	FM/DAB/TV	Community	Web/CSV exports	RDS maps, global VHF coverage	Restricted registration
MWList	MW/LW/Tropical	User-driven	Web lists, logbook	Regional AM DX scans	Restricted registration

NOTE

StationFinder and its companion program ListBuilder support EiBi, Aoki, HFCC, SWSKEDS, and ILG file formats. ListBuilder merges EiBi, Aoki, and HFCC into a merge format similar to SWSKEDS.
